Weight range of Multi Piston Ciberpan Dividers

Information given to me today by phone:

	<u>2 Pistons</u>	<u>3 Pistons</u>	<u>4 Pistons</u>	<u>5 Pistons</u>
Maximum piston diameter	90 mm	90 mm	80 mm	60 mm
Minimum/Maximum weight	30 – 400 gr	30 – 300 gr	25 – 250 gr	20 – 200 gr

For hourly production numbers I would use 30 cuts per minutes.

Please note that for multiple head units you cannot use the weights you see listed under 1 piston dividers.

All multiple dividers come with diagonal pre-rounders.
